Linnestudenterna

1 Introduction

2 Equal value of all humans is the foundation of Linnéstudenterna. In a democratic organisation it
3 is important to reflect over what this means, and how we incorporate this principle in our daily
4 life

5 Linnéstudenterna's core values are the foundation for all our activities. It is important that this
6 document is alive, accessible and covers plans for the future. The board, together with the staff
7 must continuously react to and reflect on the core values and the core values document is also a
8 document for our members. The core values document is also the starting point for
9 Linnéstudenterna's regulatory documents and must be seen as the foundation for the theme for
10 opinion documents, policy documents and other target documents for this organisation.

11 To create such a foundation for the activities, the core values all spring from four value words:
12 Security, Progress, Community and Accessibility. These value words will infuse all parts of
13 Linnéstudenterna's operations and are represented through our graphic profile by the mottos
14 "See You", "We Work for You" and "We Care".

15 Security

16 Linnéstudenterna will be a Security for the students at Linnaeus University. All students will be
17 safe in the knowledge that we listen to those who come to us, and we support those in need of
18 support.

19 All students must be safe in the knowledge that Linnéstudenterna are up-to-date with the
20 regulations that apply for students and that we monitor students' rights. The University and the
21 communities in the two university towns are all important cooperation partners so that
22 Linnéstudenterna can ensure that the students will have a good and secure time as students

23 The Student Union works for the students and students must feel that we are accessible so that
24 contacting us through e-mail, phone or by visiting our offices comes natural.

25

26 Progress

27 The value word Progress is connected to commitment, influence and sustainability. Progress
28 requires dedication. Thanks to committed students, we can build a strong and dedicated student
29 union, therefore commitment by and for students is vital for our operation. Linnéstudenterna
30 must influence and be influenced. Student union influence starts with our members and is the
31 foundation for the influence work that is the core of our activities. Linnéstudenterna must strive
32 for sustainability in all our activities, and set a good example when it comes to study social,
33 academic and environmental issues.

34

35

1 Community

2 Linnéstudenternas members are the foundation for all our actions. The members and their
3 contributions set the objectives for Linnéstudenternas activities. Linnéstudenternas most
4 important co-operation partners are the student associations at Linnaeus University. The most
5 important condition for a well-functioning student life is the dedication of the students, upheld
6 by the student associations. We are an organization by students, for students. Without committed
7 students there will be no student life and no student union. Linnéstudenterna supports an active
8 student life motivated by openness and inclusion.

9

10 Accessibility

11 With the term accessibility Linnéstudenterna wants to convey perceptiveness, visibility and
12 presence to the students at Linnaeus University. Linnéstudenterna is an organisation who listens
13 to the needs of their members, we are always there and are accessible for students.

14 Everything that Linnéstudenterna plans and communicates must be adapted for accessibility. All
15 the information we communicate and the activities and campaigns we plan must be focused
16 through the lens of accessibility.

17 The implementation if the accessibility focus may vary. Students are a diverse group and this fact
18 will require Linnéstudenterna to be a flexible student union and we must vary our methods and
19 strategies when communicating, planning and acting.
